By co-launching the open-source Business Intelligence and Reporting Tools (BIRT) projects. By co-launching the open-source Business Intelligence and Reporting Tools (BIRT) projects. The BIRT code, which will benefit from Actuate's technical expertise, will be created from scratch and targeted primarily at Java developers and power users. Actuate wants the feedback of the open-source community, Mark Coggins, senior vice president of engineering at the company, said during a conference call to discuss the move. He also said in a statement that working with the Eclipse Foundation would be a way of developing the application with the principles of "transparency and meritocracy, where the best ideas and methods will be incorporated." By making reporting tasks simpler and more easily adopted, the company envisions BIRT as eventually being an enterprise-ready rival to Microsoft Corp.'s Reporting Services platform. Actuate will embed BIRT-generated code into its own commercial applications at the same time the technology becomes part of open-source development. The company may also offer paid technical support around BIRT, and other companies will be free to develop and sell products built around it, in accordance with the Eclipse Public License model. The project proposal will be available for public review and communications, Inc. Actuate is the founder and co-director of the "open source" Eclipse BIRT project. BIRT is known for rich and attractive data visualization presentations, it offers a variety of tools to build reports quickly. Reporting a report template (or report model) with BIRT Designer, as well as generating a report template (or report model) with BIRT Designer, as well as generating a report template (or report model) with BIRT Designer, as well as generating a report template (or report model) with BIRT Designer, as well as generating a report template (or report model) with BIRT Designer, as well as generating a report template (or report model) with BIRT Designer, as well as generating a report template (or report model) with BIRT Designer, as well as generating a report template (or report model) with BIRT Designer, as well as generating a report template (or report model) with BIRT Designer, as well as generating a report model (or report model) with BIRT Designer, as well as generating a report model (or report model) with BIRT Designer, as well as generating a report model (or report model) with BIRT Designer, as well as generating a report model (or report model) with BIRT Designer, as well as generating a report model (or report model) with BIRT Designer, as well as generating a report model (or report model) with BIRT Designer, as well as generating a report model (or report model) with BIRT Designer, as well as generating a report model (or report model) with BIRT Designer, as well as generating a report model (or report model) with BIRT Designer, as well as generating a report model (or report model) with BIRT Designer, as well as generating a report model (or report model) with BIRT Designer, as well as generating a report model (or report model) with BIRT Designer, as well as generating a report model (or report model) with BIRT Designer, as well as generating a report model (or report model) with BIRT Designer, as well as generating a report model (or report model) with BIRT Designer, as well as generating a report model (or report model) with BIRT Designer, as well as generating a report model (or report model) with BIRT De project implementation and integration in your systems. We provide BIRT consulting and BIRT training for a wide variety of clients, mainly in the financial sector. Here are some of the challenges we have helped our customers with: Development of complex report templates based on libraries of reusable objects Development of highly-flexible parameterized reportsDevelopment of high-quality print reportsCustomization of report templates for multiple output channels (DHTML, PDF, print, etc.)Our consultants have more than 10 years experience with the BIRT Report Designer. They have been involved with the design and development of Java / BIRT reporting applications. Contact us for more information or a free quote In January 2015, OpenText acquired Actuate Corporation, adding powerful analytics to the OpenText product portfolio and enabling companies to analyze and visualize a broad range of structured, semi-structured, and unstructured data. Complementing OpenText information management and B2B integration offerings, Actuate is now OpenText Analytics, providing companies with increased business process efficiencies, greater brand experience and personalized insight for better and faster decisions via analytics and visualization. Opentext Analytics and Reporting products help to make data-driven applications simple for all, including developers, IT, employees and customers. Learn More See all OpenText Analytics products, or learn more about: OpenText Analytics and data visualization platform that enables the design, deployment, and management of secure, interactive web applications, reports, and dashboards fed by multiple data sources.
